EcoLine™ Cleaner/Degreaser

PRODUCT DESCRIPTION

EcoLine™ products are based on a renewable resource soybean derivative, soybean methyl esters. Methyl esters have been used in this revolutionary, environmentally low-impact technology as solvents. These soya-based products provide excellent lubricity and biodegradability. EcoLine products are better for the environment and leave behind a high performance VCI corrosion protecting layer.

EcoLine™ Cleaner/Degreaser is a heavy-duty, water-dilutable cleaner/degreaser for tough cleaning jobs in industrial and commercial applications. It is ideal for cleaning machinery, shop tools, hoods, parts in process, food processing equipment, office equipment, floors, walls and desks. EcoLine™ Cleaner/Degreaser can be used on all engineering metals and alloys. Unlike harmful or hazardous solvent cleaners, EcoLine™ Cleaner is safe to handle and nonflammable.
